

## Implémentation Servlet

Lien GitHub : <https://github.com/joebarouk/Implementation-Servlet>

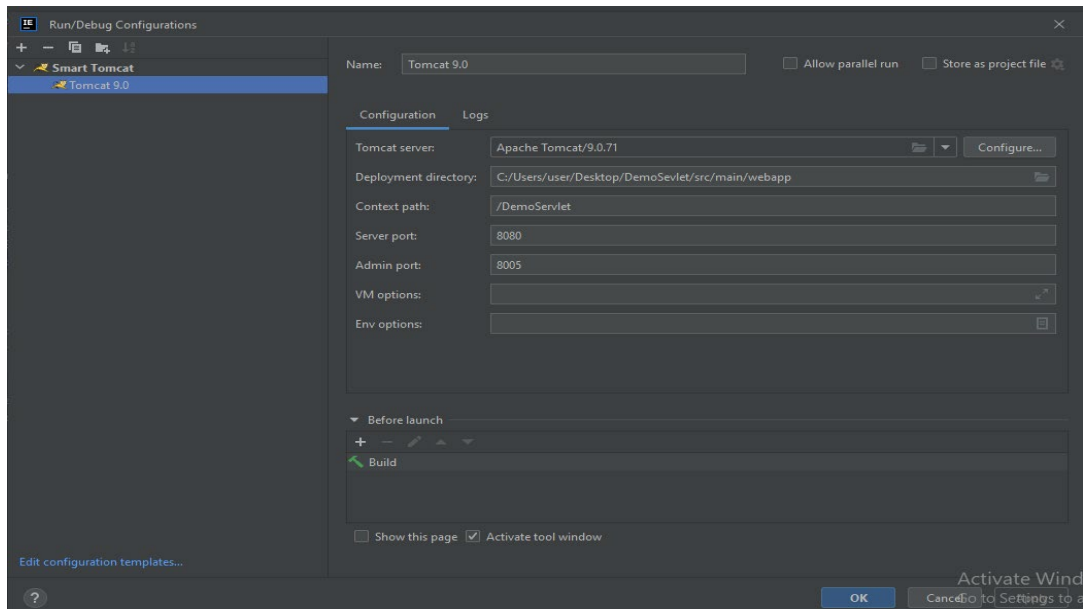

- 1- I downloaded Apache Tomcat 9.0.
- 2- I created a Maven project which supports web apps in IntelliJ IDEA.

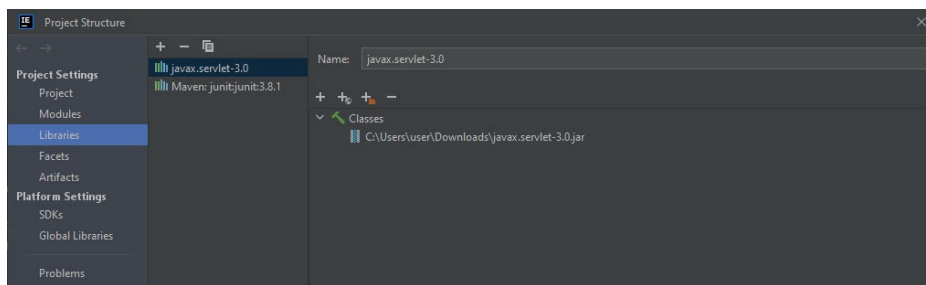

- 3- I installed the smart tomcat plugin in IntelliJ.

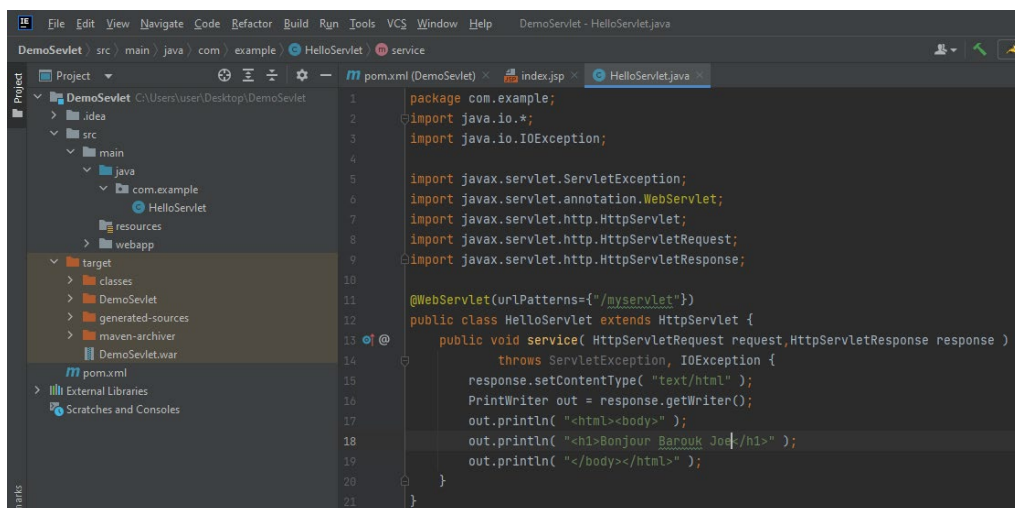

4- I configured tomcat 9.0 in IntelliJ.

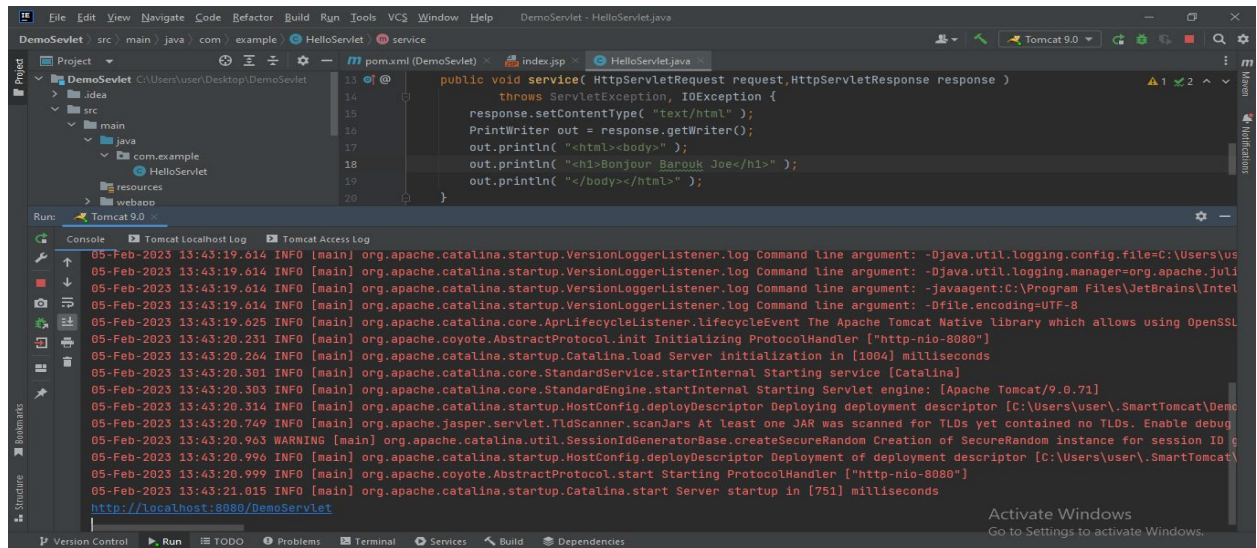

5- I downloaded the javax servlet jar file and integrated it into IntelliJ.

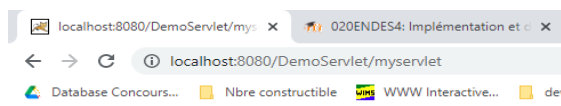

6- I implemented the servlet.

7- I deployed the servlet.

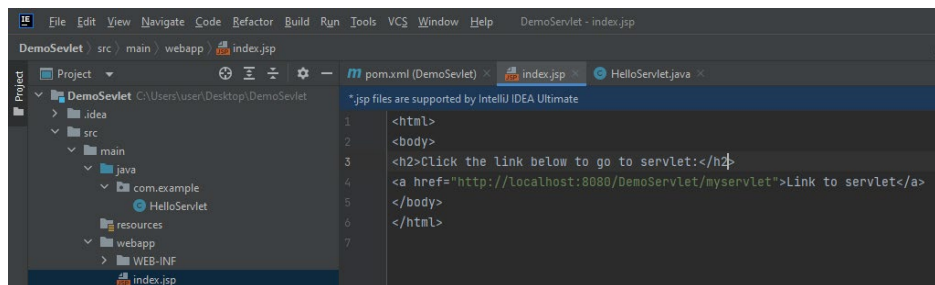

8- I tested the servlet in the browser.

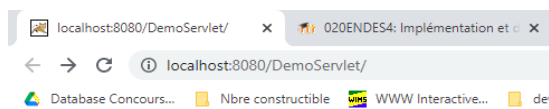

**Bonjour Barouk Joe**

9- I created an HTML page with the link to the servlet.

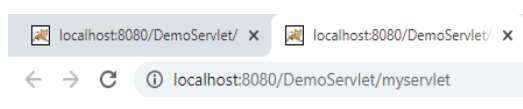

10- I tested the link in the browser.

**Click the link below to go to servlet:**

[Link to servlet](http://localhost:8080/DemoServlet/myservlet)
